

Introduction

We thank you on your choice of Contagiri and for your confidence in our company. Your choice brings you technical innovation, accuracy and endurance. Every Giuliano Mazzuoli watch has been tested to guarantee water resistance and perfect functioning. The materials we use guarantee the durability of our watches, even under particularly severe operating conditions. The international guarantee of your Contagiri is recognized by Giuliano Mazzuoli Service Centers. Defects caused by accidental damage, alterations, unauthorized repairs and modifications or consequences resulting from the normal use and aging of the watch are excluded from the guarantee. With a unique design, your Contagiri offers the highest technical achievement. We trust it will bring you complete satisfaction.

contagiri

Position 0 (normal position)

- 1 Hour hand
 - 2 Small hand
 - 3 Turning lunette
 - 4 Function lever
 - 5 Function indicator
- (calibre GM/Cambiosequenziale/01)

Calibre GM/Cambiosequenziale/01 functions

Position 1 (position to set the time)

Position 2 (winding the watch)

Normal position

The watch does not use a crown to wind the watch or to set the time. The watch has a lever (which activates the *GM/Cambiosequenziale/01*) and through the lunette of the watch you can carry out the functions usually done through the crown. In normal position (position 0) the small hand in motion indicates that the watch is running normally. In this position the accidental changing of the time is avoided and the case is protected from water infiltrations.

Winding position

By pushing the lower part of the lever towards the watch, the upper part of the lever will come out allowing you to push it out a few millimeters (illustration 1). The Giuliano Mazzuoli logo will disappear and in its place the number 1 will appear. In this position the watch is in winding position (position 1): the watch can be wound by turning the lunette clockwise or counter clockwise like you would through a normal crown. Pushing the lever back towards the watch, the Giuliano Mazzuoli logo reappears and the "automatic" watch if worn will continue running.

Setting the time

By pushing the lever out a few more degrees from the winding position, the number 2 will appear in the function indicator (illustration 2) and the watch is in time-setting position (position 2). By turning the lunette clockwise or counter-clockwise, the time can be set. By pushing the lever towards the watch in its starting position (position 0), the Giuliano Mazzuoli logo reappears and the watch will start running again.

Dial

Contagiri has one-hand that moves in an arc of 270° and retrogrades. The numbering on the dial offers immediate legibility. The indicators between one hour and another indicate the minutes as follows: the first short line indicates 15 minutes, the long line at the center indicates the 30 minutes, and the other short line indicates the 45 minutes. The small hand that completes an arc of 360° does not indicate the seconds but confirms that the watch is running.

Caring for your Giuliano Mazzuoli watch

Every quality watch requires a certain amount of care. The following guidelines will enable you to ensure your Contagiri's reliability and protect its appearance over time.

Cleaning: Be sure to rinse your watch regularly with fresh water and soap, especially after it has been in salt water. Please remember that your watch is water-resistant only when the function lever is closed (normal position).

Condensation: If the temperature changes suddenly, a slight condensation may appear under the crystal of your watch. This mist will disappear by itself and will not affect the functioning of the watch. If the condensation persists, please see your authorized Giuliano Mazzuoli dealer.

Pressure seals: Over time, the pressure seals on your watch may deteriorate. We recommend that you have the water-resistance of your watch checked once a year by your Giuliano Mazzuoli dealer, who will replace the seals if necessary.

Straps: In caring for the rubber strap it is recommended to clean it with soap and water once a month.
